

SCHOOL FOR ADVANCED STUDIES

Campus Improvement Plan 2026-2027	
Goal 1: English Language Arts	Timeline
Of the students in grades 5 - 8 achieving level 1 or 2 on the 2025-2026 summative ELA Atlas test, 50% or more of those students will improve their ELA Scale score by 15 or more points on the 2026-2027 summative ELA ATLAS test, demonstrating continued academic growth in ELA.	May, 2027
Goal 2: Literacy - Closing Gaps	Timeline
Students identified as at risk based on ATLAS 2025-2026 Summative scores and BOY diagnostic results, will close the gap between their scores and state averages, utilizing the Wit and Wisdom curriculum, described in the Arkansas R.I.S.E. approved materials.	May, 2027
Goal 3: Math	Timeline
By the end of the 2026-2027 academic year, 70% of students in grades 5 - 8 will achieve Level Three or higher on the summative ATLAS Math Assessment.	May, 2027
Implementation	
School for Advanced Studies will implement evidence-based practices, including ATLAS Interim assessments and Progress Monitoring data from Arkansas-approved intervention programs including PowerUp Literacy. Teams will evaluate data at regular intervals to drive intervention plans for students and/or cohorts. Additionally, Schools for Advanced Studies will implement evidence-based pedagogical trainings sessions and observation walkthroughs to support teacher growth.	
Professional Learning Needs	
Utilizing Title II funding, Schools for Advanced Studies teachers and staff will incorporate Arkansas Science of Reading training and strategies to drive Literacy growth. The team will support teachers in adjusting classroom practices to address real time data that reflects response to Intervention strategies for struggling students. Internal pedagogical training focused on effective application of seminar-based instruction for whole groups, as well as intervention training under the Orton Gillingham structure for students with dyslexia will also be provided. Since this is a working document, other professional development opportunities may be provided throughout the year.	

SCHOOL FOR ADVANCED STUDIES

Evaluation

The administrative team, which includes teachers, will evaluate progress toward goals and practices at intervals by which interim data becomes available. By utilizing data from 2025 ATLAS summatives and 2026 ATLAS Interim assessments the team will evaluate intervention plans for teachers, cohorts, and students. Progress toward goal will be evaluated following interim assessments as well as individual performance. Intervention teams will evaluate present level data and adjust course as necessary. These Review, Refine, and Renew meetings will take place three times per year to allow the plans to take full hold, while also reviewing in an appropriate frequency to address gaps toward goal.
